FACULTY OF CIVIL ENGINEERING
DEAN´S OFFICE
prof. Ing. Jiří Máca, CSc.
FACULTY DEAN

29. 1. 2025, Prague

Dear colleague,

I would like to extend to you an **invitation for your students in Bachelor´s, Master´s and Doctoral degree studies** to participate in **the Hall of the Year 2025 international competition.**

The Hall of the Year competition helps students understand how loads act on a structure in practice, where its weaknesses may be, how important the processing of details is, etc. At the same time, it teaches them how to use the knowledge gained during their studies and how to work in a team.

For university students, the competition has been announced in two categories.

The Hall of the Year Academic is open for students in the Bachelor´s and Master´s degree studies at technical universities. The competition was relaunched in 2017, with 37 teams from both the Czech Republic and abroad taking part in the 2024 finals whose proficiency was judged by an international jury. In this competition, the contestants at home design and build a model of a structure following prescribed instructions, and subsequently subject it to a load test during the finals at the Faculty. The final ranking of models is based on their effectiveness, which is defined as the ratio of the model's load-bearing capacity to its weight. Attractive prizes have been prepared for the contestants - the first team will receive a prize of 100,000 CZK, and the four runner-up teams will be awarded the sum of 40,000 CZK, 15,000 CZK, 5,000 CZK and 3,000 CZK. There are also rewards presented by the competition partners.

Doctoral degree students compete in the Hall of the Year Advanced competition. The competition was conceived in 2023 based on the students´ interest in presenting their skills and abilities. The competition has an adrenaline-fuelled approach, with the teams assembling a model directly at the Faculty on the competition day, using materials provided to them. On that day, they submit their model to a load test. The winning team will receive a prize of 25,000 CZK, with additional prizes awarded to the next two runner-up teams. The last year's second competition year was attended by 9 teams.

The Hall of the Year Academic competition will be held on 8th April 2025.

The Hall of the Year Advanced competition will be held on 9th April 2025.

Students register for the completion in 2-3-member teams. The teams can register by 17th March 2025 by 12.00 a.m.

The competition is held under my patronage and under the patronage of the Czech Chamber of Chartered Engineers and Technicians (ČKAIT), the professional guarantor is our Faculty´s Department of Architectural Engineering.

The competition has extensive media support, and its partners are prestigious companies from the construction sector. The general partner of the Hall of the Year competition is HOCHTIEF CZ.

I would be very glad if you could pass the above information on to your students. Detailed information about the competition, its rules and registration can be found at **https://halaroku.fsv.cvut.cz**.

We look forward to the participation of your students!

Yours faithfully,

prof. Jiří Máca
Faculty Dean
